Examiner William P. Neuder

**Amendments to the claims:**

The listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently amended) A service rig or workover rig that is designed for transport to and from a well on the rear of a rig carrier and in operation is attached to the rig carrier and supported over a substructure of the well, the service or workover rig in operation comprising:
  - a mast supported at an angle to the vertical over the substructure of the well;
  - a torque carrier suspended from the mast; and
  - a brace having a torque carrier end connected to the torque carrier for conveying torque from the torque carrier into the brace, the brace having an anchored end with a fastener for attaching the brace to the ~~back of the rig or a~~ substructure ~~at a~~ of the well.
2. (Currently amended) The service or workover rig of claim 1 in which, ~~when the service rig has a substructure and is in operation over the well,~~ the anchored end of the brace is horizontally offset from a point on the substructure directly below the torque carrier end of the brace.
3. (Currently amended) The service or workover rig of claim 2 in which the anchored end of the brace, when in operative position, is oriented parallel to an extension of the torque carrier.
4. (Currently amended) The service or workover rig of claim 1 in which the anchored end of the brace constitutes an offset extension of the torque carrier.

Claims 5-10. Cancelled.
